

Introduction to Gentleman Ghouls NFT

Gentleman Ghouls are a collection of randomly generated NFTs on the Ethereum blockchain with a total supply of 10,000. Each Gentleman Ghoul has 6 categories of traits assembled from a total number of 260+ traits.

Vision and Mission

We made this project with the Nashville Tennessee community in high focus so you will see some rare and super-rare with a little nod to a great city that we love. As many projects struggle after mint and fall off, we have started to create multiple projects that cascade across all types of Crypto projects that will allow us to keep the project up for a long time as well as being self-sustaining.

We have formed a crypto development team that is currently moving to develop several exciting projects. Some of the projects launching are a metaverse game, an exchange or crypto trading platform, and a real estate backed coin with a unique purpose as well as a DAO.

Our mission is to give a sense of belonging with our project and give people the opportunity to use the NFTs that they purchase to get exclusive initial access to our future projects above. Plus, we just think our art is amazing!

Art of the Gentleman Ghouls NFT Collection.

Uniqueness

With a lot of new NFT projects being derivatives of already popular ones or blatant copies, we wanted to make something unique. That's why we came up with the idea to make bada\$\$ figures, that give off a throw a cool vibe, but also allows the user to use their imagination.

Traits, supply, and rarity

When the idea came, we started to make the art immediately. We wanted a low supply and a large amount of traits to make the collection special.

The Gentleman Ghouls collection will feature 10,000 NFTs from 260+ traits. Every trait is unique. A low supply and a high trait count makes the art extremely valuable and every Gentleman Ghoul is different.

We implemented a very unique rarity system where the background, weapons actually look unique. More on the rarity on a later date. This whitepaper will also feature a rarity section in the future.

Gentleman Ghouls Mint Funds Allocation

Detailed allocation of Gentleman Ghouls NFT Project mint funds.

Gentleman Ghouls NFT Project details:

- Supply: 10,000 (Phase 1)
- Price: Base Price of 2.5 ETH
- Architecture: Ethereum Network (ERC20)
- NFT Platform: OpenSea
- Area of Focus: Nashville, Tennessee

Private seed round

Private seed investors are the reason we have the opportunity to make such an incredible project. Without them we wouldn't be where we are now. 20% of the mint funds will be allocated to our partners and seed investors, who have helped us make the Gentleman Ghouls NFT Project.

Charity

The next 20% will be allocated to give a person a second chance. The individual was paralyzed in a freak boating accident and with this project we will dedicate money to send him to Stem Cell Therapy in South America to get him back on his feet again and hopefully the ability to walk again. This tragic accident happened a year ago and his recovery has not restored his abilities back to pre-accident levels. The monies from this project will be earmarked for this purpose firstly before any dollars are spent elsewhere. Please check out the news article link on <http://www.GentlemanGhoul.com>.

Core Team

Gentleman Ghouls NFT project consists of 4 members - the Core Team of Cryptoverse Development LLC. The Core team will only receive 50% of the total mint funds, which is incredibly low compared to other NFT projects, where the team takes 80-100% of total funds gathered from mint. We are furtherly investing a good portion of funds back to a charity for support of individuals that are paralyzed.

Project Marketing

We will allocate 5% of the total mint funds to further market the Gentleman Ghouls NFT project after launch. This will help us keep Gentleman Ghouls on the NFT Map and let new investors join our amazing community.

Community Wallet

The last 2% of total mint funds will be allocated to the Community Wallet. With this we can continue on the development of the Gentleman Ghouls NFT Project roadmap. Remember, Crypto Mining and the

Community Wallet are in high correlation, 100% of all the mining funds (35 000 EUR - 60 000 EUR monthly) will be invested back into the community wallet for Gentleman Ghoul's NFT to further the development of the project.

Roadmap list

The roadmap of the Gentleman Ghoul's NFT project. It will be updated regularly with updates.

- Roadmap 0.1
- Launch Website
- Launch Discord
- Launch Special Discord Channels
- Roadmap 2.0 will be dominantly decided by the Gentleman Ghoul's NFT holders via the DAO. It will launch after Roadmap 1.0 is fully completed.

When will it Launch?

Gentleman Ghoul's Merch Store will launch after the project has been minted out. The store will include anything suggested by the community: caps, beanies, hoodies, t-shirts, long sleeves, stickers and pins.

DAO

The Gentleman Ghoul's DAO, by the Core Team for the Gentleman Ghoul's.

Main function

The main purpose of the Gentleman Ghoul's DAO is to vote on future prospects and hold exclusive events for the Gentleman Ghoul's holders.

Each Gentleman Ghoul NFT will count as one vote. Most major changes regarding the project will be decided by the DAO, such as:

1. Mining profit allocations
2. Next steps in the roadmap
3. In real life events
4. Any major change that has a huge impact on the project.

Usually if the team has a new ambitious idea, they will ask the community in Discord first. If it gets a good response, it will go to the DAO, where the main vote will be held. We want to involve the community in the project as much as possible.
